Chief, Collection Division
ATTN: Chief, Collection Branch

4 September 1957

Chief, Production Division

Railroad Data, Hungary (U)

1. Reference is made to SRI No. CE 2994-TC, subject as above, scheduled for transmittal to [REDACTED] 25X1C

2. The following is submitted in satisfaction of portions thereof, based on information available to Technical Branch:

a. Soviet broad (5') gage tracks extend approximately nine miles southward into Hungary from the U.S.S.R.-Hungary border, through ZAHONY to the town of CSOKOS. These broad gage tracks parallel the standard (4' - 8 $\frac{1}{2}$ ") gage tracks of the Hungarian line ZAHONY-DEBRECEN.

b. Transloading on this broad gage extension can be accomplished at the transfer yard containing eight tracks at CSOKOS and at the eleven-track transfer yard of TUZSER. CSOKOS is approximately seven miles and TUZSER is approximately four miles from ZAHONY.

c. There are no indications that transloading of oil takes place along this broad gage extension to CSOKOS.

d. The standard gage-broad gage connection at ZAHONY is the only existing rail connection between HUNGARY and the U.S.S.R.

[REDACTED]
Colonel, GS
Chief, Production Division
